RE: Reconnaissance Level Characterization Report (RLCR)/Pre-Demolition Survey Report (PDSR) for
Building 440 Eastside - Concurrence & Approval

Dear Mr. Legare:

Parsons, D. X

Freiboth, C. X

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the RLCR/PDSR for Building 440 Eastside Closure Project; Revision 0 dated May 12, 2005. Revisions have been made based on comments provided. We received a copy of your letter regarding this RLCR/PDSR on May 19, 2005. Based on the information contained in this RLCR/PDSR, as revised, and the RCRA Unit 440.1 closure documentation for Room 141 as provided, we are hereby concurring that Building 440 Eastside is a Type 2 Facility, as well as approving the PDSR for B440 Eastside.

Although we are concurring with the Type 2 designation for B440 Eastside, since no contamination was found and this section of B440 can be physically separated from the Westside of B440, we also agree that B440 Eastside may be demolished utilizing the Facility Disposition RSOP without submitting a demolition Notification or the 6 point analysis of the Component Removal RSOP Section 3.8.1, as long as the integrity of the building shell of B440 Westside is maintained. However, as a Type 2 Facility, a Closeout Report for B440, including the east and west sides must be submitted for our review and approval.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.
